

DATA SHEET

Condrogen® Adult & Sport

Last update: 23/06/2026

For supporting joint performance in adult and sporting dogs

Joint health is the key to mobility and, consequently, to overall well-being. In sporting dogs, it is also essential for athletic performance. The exclusive formula of Condrogen® Adult & Sport nourishes and protects all joint structures (cartilage, muscles, tendons, and ligaments), while supporting their energy metabolism.

Condrogen® Adult & Sport is recommended for joint health in:

- healthy adult dogs, especially large and giant breeds;
- sporting dogs (e.g., sled dogs, agility, hoops, water sports, coursing), search and rescue dogs, and highly active dogs.

Additionally, Condrogen® Adult & Sport is indicated during physiotherapy rehabilitation to support muscle recovery after periods of immobilisation (e.g., following injuries and/or surgical procedures).

Species: **Dog**

Packaging and Prices

Condrogen® Adult & Sport	30 sticks	39,40 €	cod. 2188	
Condrogen® Adult & Sport	60 sticks	66,70 €	cod. 2187	

Use

The content of the stick can be administered directly into the animal's mouth or mixed with food. To be used for periods of at least 60 days.

In sporting dogs, it is advised to use the product during periods of intense physical activity. For best results, administer after an intense exercise session, preferably within 30 minutes, or between two competition rounds.

Daily quantity

Body weight (kg)	Sticks / day
0-10	1
11-20	2
>20	3

Properties

Palmitoyl-glucosamine (PGA) is a slow-release glucosamine source (building-block of cartilage) and contributes to the natural balance of the other joint components. Condrogen® Adult & Sport contains **PGA-m**, an exclusive form of PGA which ensures its greater bioavailability thanks to an innovative process of particle super-reduction (micronisation).

The antioxidant complex formed by **Selenium** and **vitamin E** neutralises free radicals produced during physical exercise.

Marine (fish) **collagen** maintains the proper elasticity of tendons and ligaments.

Maltodextrins provide a constant supply of energy, thus supporting the proper muscle function and a rapid muscle recovery.

Functional principle	Quantity
PGA-m (micronised palmitoyl-glucosamine) (1)	150 mg/stick
Selenium	0.077 mg/stick
Vitamin E	30 mg/stick
Fish collagen	1000 mg/stick
Maltodextrin	1500 mg/stick

(1) particle size: 94% < 10 micron

Ingredients

COMPOSITION Maltodextrin (47.6%), hydrolyzed fish collagen (31.8%), palmitoyl-glucosamine (4.8%), disodium dihydrogen diphosphate, inactivated yeasts, sodium chloride, lupin protein meal, vegetable oil (sunflower seed). ADDITIVES Nutritional additives: Vitamin E (9524 mg/kg); Selenised yeast *Saccharomyces cerevisiae* NCYC R397, inactivated (Selenium: 24.4 mg/kg). ANALYTICAL CONSTITUENTS Crude protein (30%); crude fibre (7%); crude fat (4%); crude ash (5%).
