## DATA SHEET

# Restomyl® Gel

Last update: 02/07/2026

## For the oral mucosa health

Useful for maintaining the oral mucosa health of dogs and cats, also in combination with specialist dental procedures (e.g., dental scaling and polishing, tooth extractions, reduction of periodontal pockets).

Restomyl® Gel isn't a veterinary drug. It's a product for the oral hygiene of dogs and cats.

Species: **Dog • Cat**

## Packaging and Prices

Restomyl® Gel

30 ml

22,90 €

R.R.P.\*

Cod. 2020

\* Recommended retail price

## Use

Raise the lip, exerting slight pressure with the tip of the dispenser and ensure that the gel outlet hole is facing towards the mouth. Press the dispenser one or more times, depending on the size of the animal. As a result of its excellent mucoadhesive properties, the gel will rapidly be distributed over the entire oral mucosa. Repeat the application 2 or 3 times a day. When using for the first time, press the dispenser several times until the gel comes out. Do not force the outlet hole with metal points or the like.

## Properties

**Adelmidrol** - a congener of palmitoylethanolamide - maintains the proper function of the oral mucosa, through a soothing and anti-redness action. **Phytosphingosine** helps to keep in balance the oral microflora and ensures proper oral health and hygiene. **Traumatic acid** is a plant-derived substance that maintains the integrity of the oral mucosa. **Hyaluronic acid** gives the formulation strong mucoadhesive properties, thereby maintaining in situ and optimizing the activity of the other functional principles.

## Functional principle

Adelmidrol

Traumatic acid

Phytosphingosine

Hyaluronic acid

## Ingredients

Aqua, glycerin, aroma, sodium pca, adelmidrol (INN), cellulose gum, noveon aa-1 polycarophil, sodium hydroxide, ethoxydiglycol, sodium hyaluronate, sodium dehydroacetate, trans-2-dodecenedioic acid, 2-bromo-2-nitropropane-1,3-diol, phytosphingosine.
