

DATA SHEET

Normalia® Fast

Last update: 24/06/2026

For a correct intestinal transit

Normalia® Fast helps to maintain the correct intestinal transit and promote the normal stool consistency in dogs and cats.

Normalia® Fast isn't a veterinary drug. It's a complementary feed for dogs and cats.

Species: **Dog • Cat**

Packaging and Prices

Normalia® Fast	10 caps	14,50 €	cod. 2089	
Normalia® Fast	100 caps	105,50 €	cod. 2092	

Use

To be administered for 5-10 days at the daily quantity shown in the table.

The capsule should preferably be swallowed whole (place it as far back over your pet's tongue as possible). Alternatively, open the capsule and spill the content into the food ration.

The simultaneous oral use with macrolides shall be avoided.

Body weight (kg)	Caps / day
0-10	1
11-20	2
>20	3

Properties

Palmitoyl-glucosamine (PGA) is a naturally occurring compound that helps to maintain the normal integrity and function of the intestinal lining. The micronised form (PGA-m) enhances PGA bioavailability and improves its ability to maintain the intestinal health of dogs and cats. The **electrolytic complex** (sodium, potassium and magnesium salts) maintains the electrolyte balance. Normalia® Fast contains **tannic acid** and **bentonite**.

Functional principle	Quantity
PGA-m*	184.89 mg/caps
Bentonite	360.5 mg/caps
Tannic acid	0.37 mg/caps
Electrolytic complex	44.3 mg/caps

* PGA-m = micronised palmitoyl-glucosamine

Ingredients

COMPOSITION Palmitoyl-glucosamine (22%), sodium chloride, potassium sulphate, sodium pyrophosphate, inactivated yeasts, lupine protein meal, sunflower oil, maltodextrin, magnesium chloride, calcium carbonate. ADDITIVES Technological additives: bentonite (434337 mg/kg). Flavourings: tannic acid (445 mg/kg). ANALYTICAL CONSTITUENTS Crude protein (5%); crude fibre (5.5%); crude fat (13.5%); crude ash (46%); sodium (1.7%); potassium (0.6%); magnesium (0.1%).
