DATA SHEET

Oculvet® Gel

Last update: 11/06/2026

Lubricant and humectant eye gel

For the protection of the canine and feline ocular surface in any condition where eye dryness and quali-quantitative changes of the tear film are a concern.

Oculvet® Gel isn't a veterinary drug. It's a product for the eye hygiene of dogs and cats.

Species: **Dog • Cat**

Packaging and Prices

Oculvet® Gel

10 ml

21,10 €

cod. 2096

Use

Gently, pull the lower eyelid down and/or raise the upper one; apply a rice grain amount of gel in the conjunctival sac; repeat the procedure two or more times a day, taking care not to touch the eye with the tip of the tube. Close the eyelid and rub gently to distribute the gel uniformly across the eye surface. Before you apply the product, remove any secretions from the area using a sterile wipe. (e.g., Oculvet® Wipes).

Properties

Inspired by the biological structure of tears, the formulation of Oculvet® gel restores both the aqueous and lipidic component of tears, giving relief in all dry-eye conditions. The combination of **hyaluronic acid** and **carbomer** gives the product an effective and prolonged lubricating and wetting action. The presence of **medium-chain triglycerides** (MCT) stabilizes the lipid layer of the eye. **Traumatic acid** helps to maintain the integrity of the eye surface. **Adelmidrol**, a palmitoylethanolamide analogue, performs a soothing action on ocular mucosa.

Functional principle

Hyaluronic acid

Carbomer

Medium-chain triglycerides

Traumatic Acid

Adelmidrol

Ingredients

Aqua, adelmidrol (INN), caprylic/capric triglyceride, carbomer, sodium hyaluronate, sodium chloride, acrylates/c10-30 alkyl acrylate crosspolymer, 2-dodecenedioic acid, dipotassium phosphate, sodium hydroxide, sodium perborate, disodium edta.
